Ex. No. 6	**Web Server Creation using Node.JS**

CODE:

```
const http = require("http");

const host = 'localhost';
const port = 8000;

const requestListener = function (req, res) {
    res.writeHead(200);
    res.end("Rahul's first server!");
};

const server = http.createServer(requestListener);
server.listen(port, host, () => {
    console.log(`Rahul's Server is running on http://${host}:${port}`);
});
```
